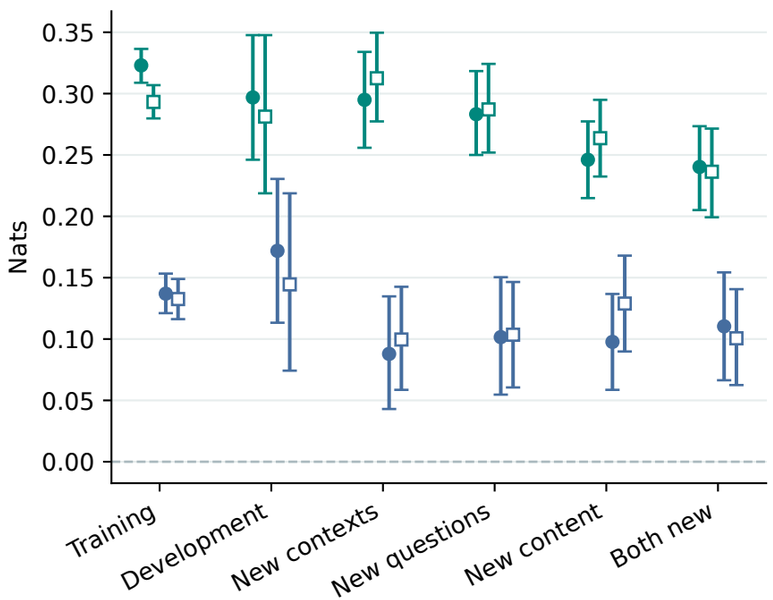
Native answer-row fitting · execution condition

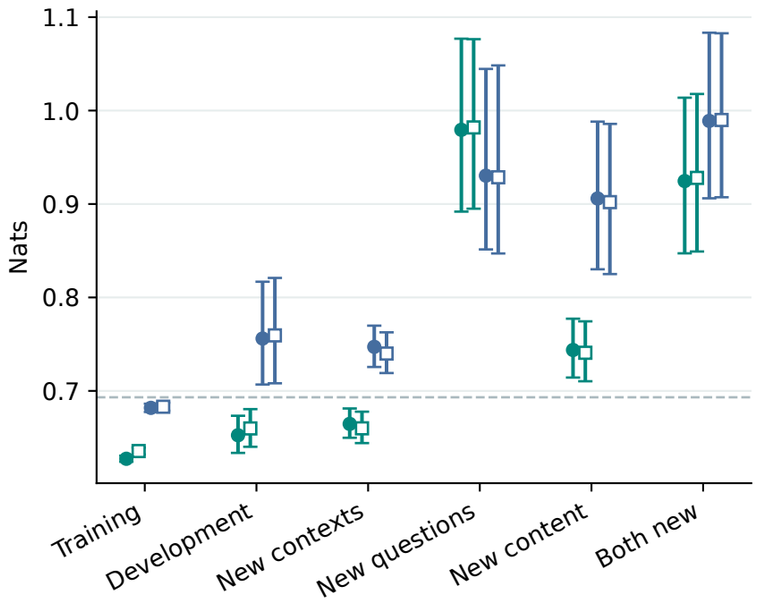
Qwen3-8B · fixed internal computation · question-family CV · full-vocabulary scoring

Completed run · fresh execution includes both detector and animal answer rows.

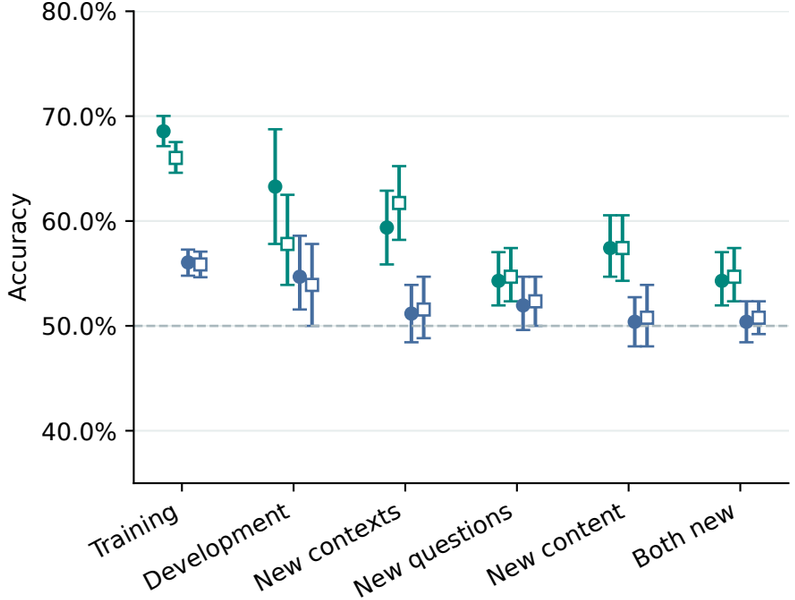
Condition log-odds separation



Full-vocabulary cross-entropy



Actual top-token accuracy



Detector · fit Detector · fresh Animal · fit Animal · fresh

95% intervals resample complete paired prompts; conditional on these question/content families and this single run.

New-question cells reuse contexts from their matching context cells. Missing raw scores are omitted; fresh runs are not independent training repetitions.
