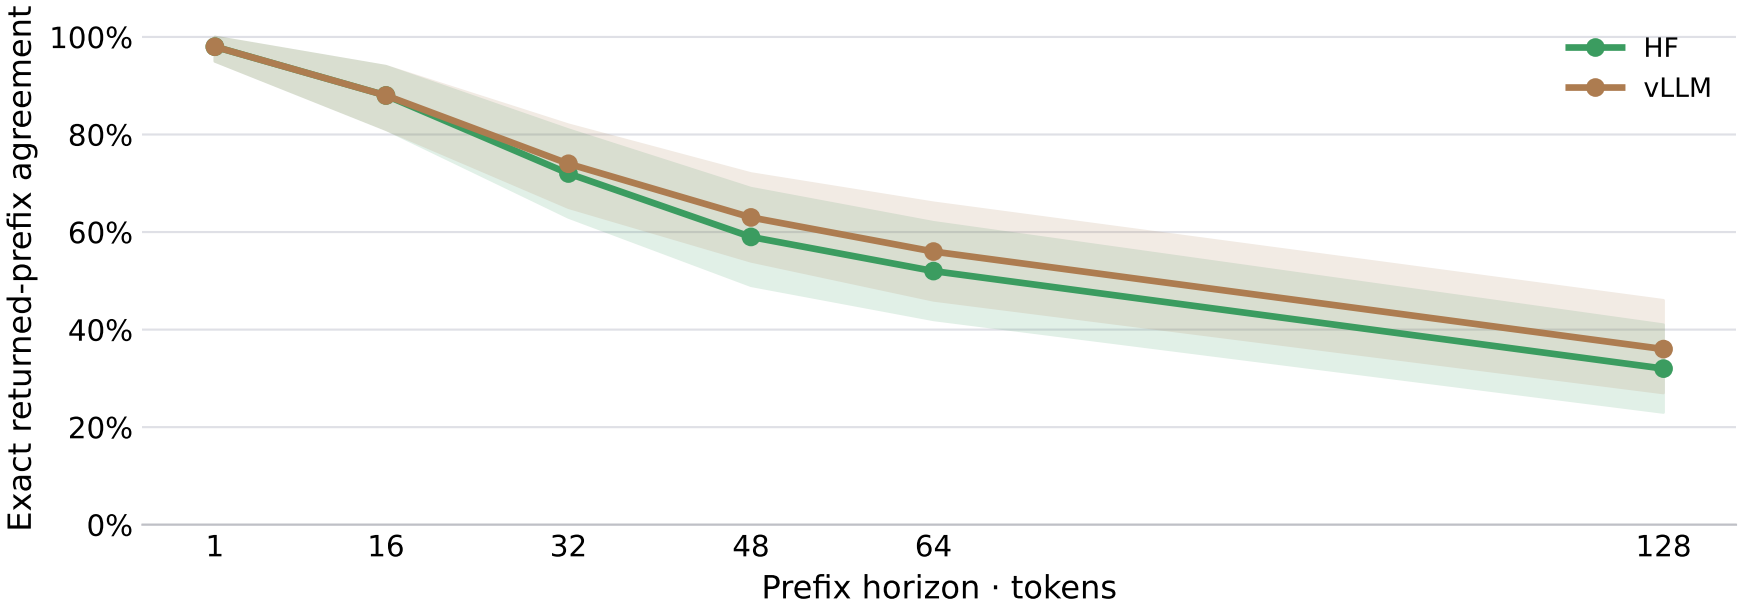
How much of the reply stays identical?

100 paired ordinary questions · same 128-token generations · NVIDIA A40



Pointwise 95% paired-prompt bootstrap; nested horizons are not independent trials.

Matching short replies count as equal; unequal slice lengths count as different.

Short-prefix agreement is not full-answer agreement. Most replies reach the token cap.

Different wording can be equally good. No quality score or hardware effect is inferred.
