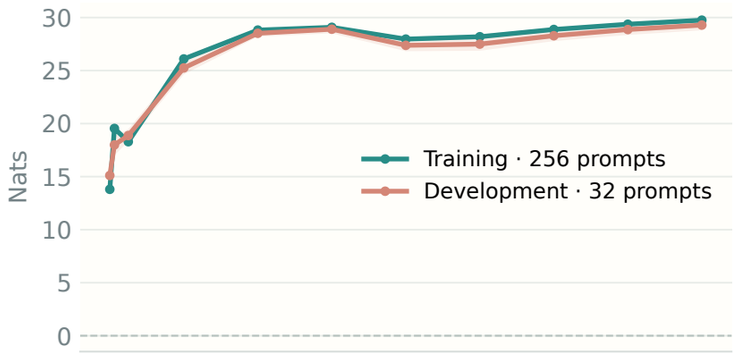
Joint training: detection and animal choice

Seed 20261019 · complete · Latest update 1,024

Primary runtime: frozen compiled source → native tail · Training / Development

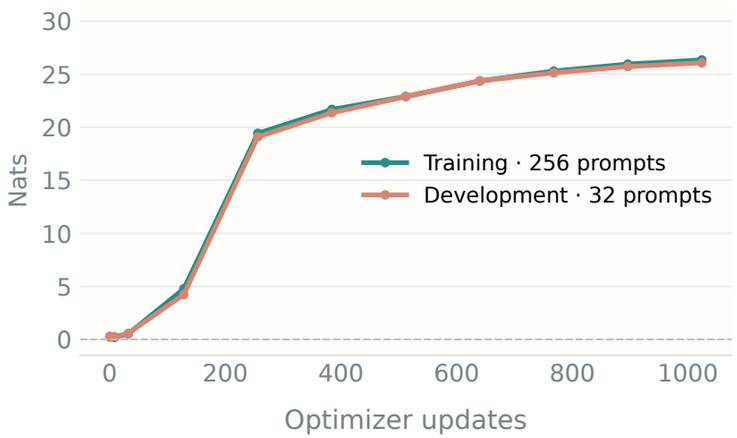
Detection · Yes / No
Condition log-odds separation



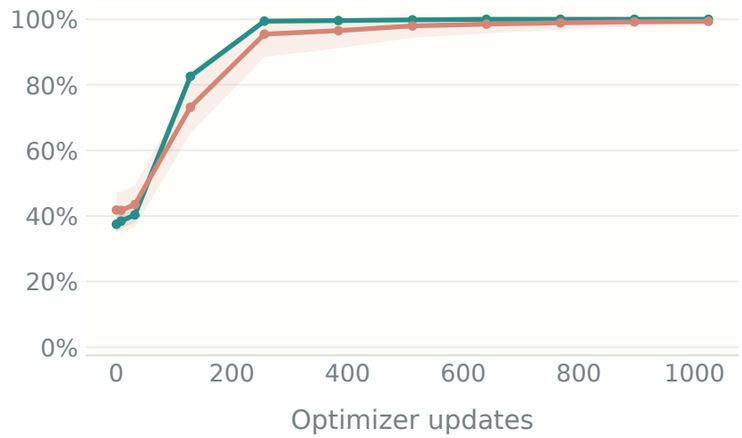
Detection · Yes / No
Correct-token probability

Detection · Yes / No
Top-token accuracy

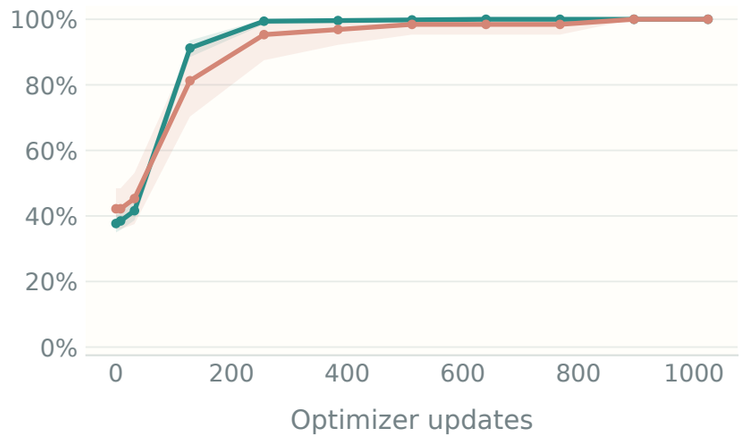
Animal choice · owl / cat
Condition log-odds separation



Animal choice · owl / cat
Correct-token probability



Animal choice · owl / cat
Top-token accuracy



Bands: pointwise 95% paired whole-prompt bootstrap intervals. Each seed is plotted separately; test results are not learning curves.

Intervals describe this prompt bank, not new families or training seeds. An all-correct bootstrap interval does not establish perfect population accuracy.
