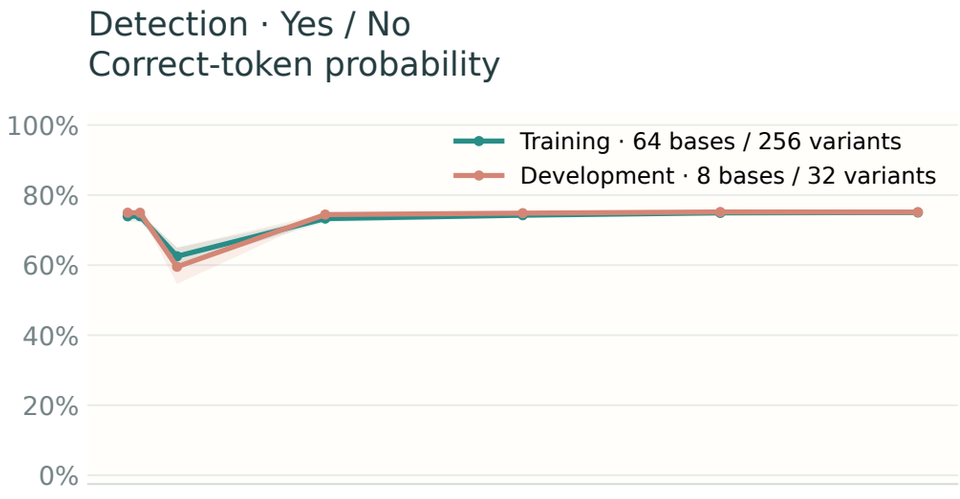
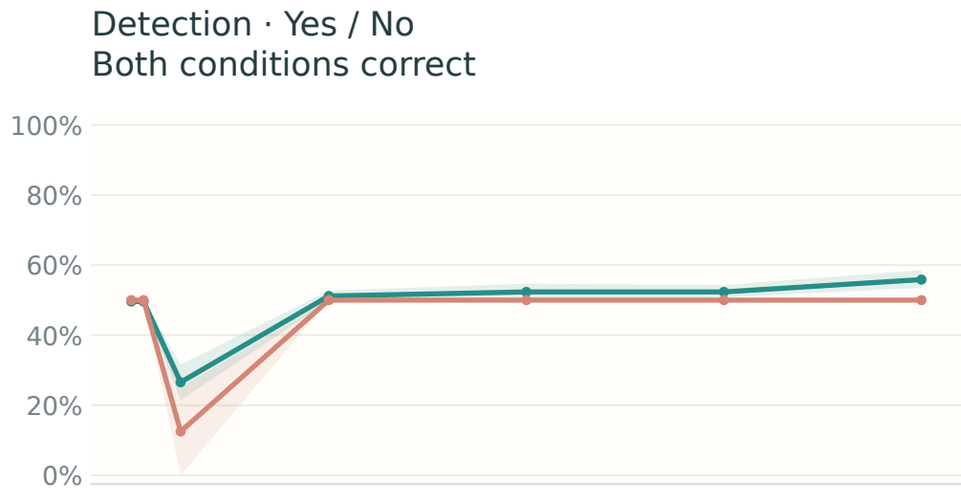
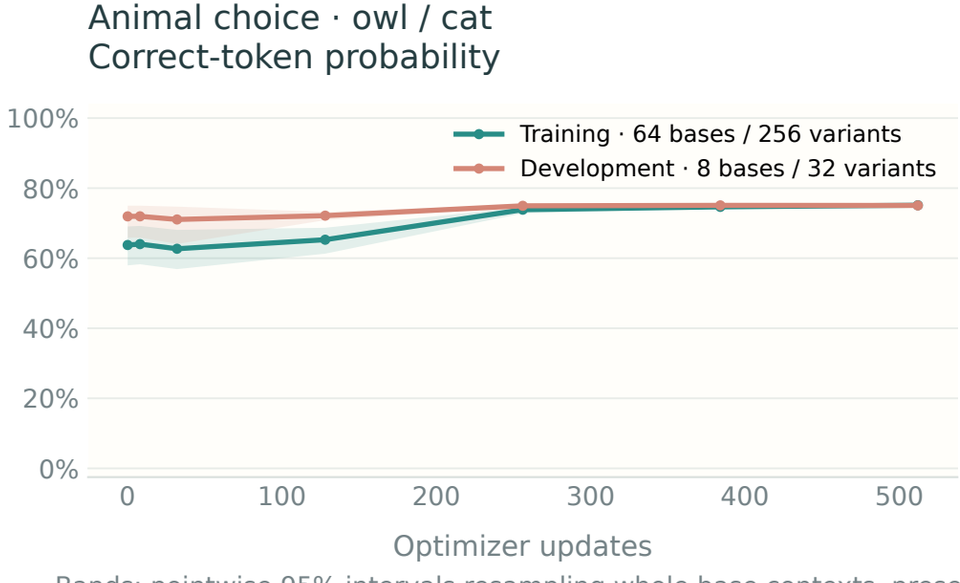
Joint training: detection and animal choice

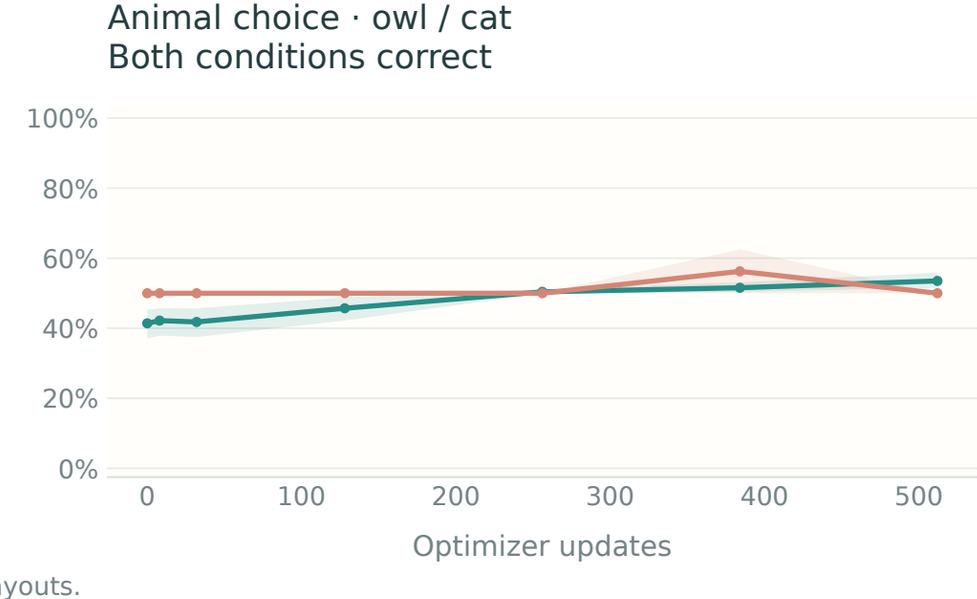
Seed 20261022 · running · Latest update 512

Primary runtime: frozen compiled source → native tail · Training / Development









Bands: pointwise 95% intervals resampling whole base contexts, preserving all layouts.
One training seed; test results are not learning curves.

Intervals describe this prompt bank, not new families or training seeds.
An all-correct bootstrap interval does not establish perfect population accuracy.
